PARTNERS:

Cryptum limited is a professional ICT infrastructure specialist that provides its customers with innovative solutions that ensure the optimization of applications, availability and manageability without process getting complex

OUR MISSION

Committed to offering inclusive customer focused ICT and engineering solutions tailor-made to serve and satisfy our clients.

OUR VISION

To be the market leader in offering the latest and the best ICT and engineering solutions in Africa

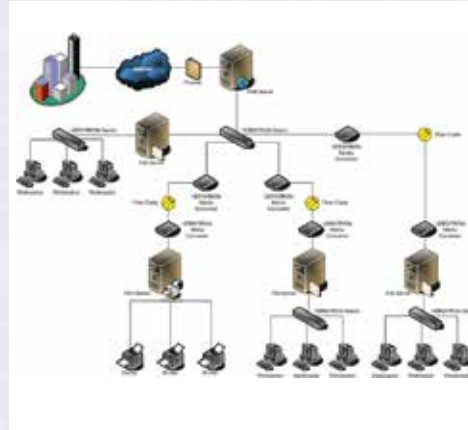

OUR PURPOSE

We exist to provide quality customer service in an ever-growing information and communication technology industry.

Our Services

Network Infrastructure

Cryptum Limited can ensure your network infrastructure meets the demands of its users. Every organisation must ensure its infrastructure can cope with the demands of modern communication. From video to virtualisation, businesses must have the capacity to accommodate the ever increasing flow of data. Every part of the network, from wireless access points to data centres, must be secure, reliable and adequately equipped to cope.

Virtualization.

Cryptum limited has VMware certified professionals, with immense virtualization knowledge to help individuals and corporates unleash this technology into their systems cutting on hardware costs while maintaining quality of service offered. Cryptum limited models VMware virtualization into service bundles as follows:

- Datacentre Virtualization*
- Desktop Virtualization*
- Vmware Vapps Design*
- Vmware Cloud.*

Security Surveillance

We make it happen with intelligent video surveillance systems, plug-and-play modules, and a core technology platform that enables users to get the benefit of a fully networked, inter-connected infrastructure - without the cost and complexity of a new enterprise-level solution. Plus, our solutions are completely customizable, and are quickly and easily deployed right out-of-the-box

Digital Forensics.

At Cryptum Limited we have a qualified team of certified and experienced professionals who are well versed in modern Cyber security certification products available in the market today. We organize boot camps for corporate training & special cases for individuals who need hands on training.

Network Security.

Testing of network infrastructure has never been more critical in today's complex evolving world. Every fast changing business needs superior IT security. We at Cryptum do not just design and install the networks, we support organizations with the protection they need. Our team at cryptum consists of certified CEH and CHFI professionals and pen-testers that do IT-auditing with the end result being a detailed vulnerability assessment report.

- Network Device Testing*
- VPN Security Assessment*
- Web Application Test*
- Wireless Testing*

IT Support.

Cryptum-limited packages all our services into bundles that suite the client's needs. our bundles range from the following:

- Network-monitoring bundle*
- Computer-solutions bundle*
- Security Assesment bundle.*
- Application Server management bundle.*
- Database server management bundle.*
- Network Device Management Bundle.*
